

Evil Robots

Evil Robots is a hidden-roles game for 3-9 humans pretending to be robots debating the future of humanity. Negotiate, bluff, and use your robot powers to get yourself on the winning team for a share of the points.

Components:

53 Cards (10 Power, 9 Guides, 34 Robots)

18 Poker Chips (double-sided)

20 Action Tokens

50 Score Tokens or 9 Dials

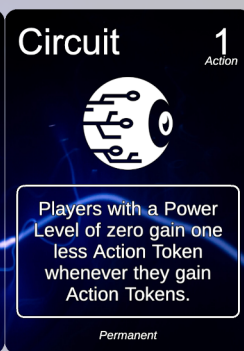

Rulesheet

Dimensions: 115mm x 165mm x 51mm

Weight: 350 grams

PAX Australia Collaboratory Finalist, 2023

Each player has two robot cards and flips two coins to determine their starting team. One of those coins remains hidden to the other players. During a round they will gain power and take actions to ensure they finish on the most powerful team. The winners share a pool of points and when any players reach ten points they win... well, they hope so anyway!

Collude, lie, and manipulate? Or negotiate, make allies, and play it safe? With quick rounds and no app or moderator required, Evil Robots is a social game that gets everyone involved.

3-9 Players

Ages 12+

20-40 mins
